ABOUT ME

Hello! I am Akash, a passionate and skilled web developer with a focus on front-end development. I am a quick learner, always eager to adopt new technical skills, and thrive on challenging projects.

KEY SKILLS

HTML	CSS Preprocessors:- SCSS, SASS	React js	SEO
CSS	Tailwind CSS	Redux Toolkit	Git
JAVASCRIPT	Bootstrap	React Router	Version Control System

PROFESSIONAL EXPERIENCE

OK Software Solution

Front Developer Intern

Oct 2023 To Dec 2023

Front-end Developer Internship in OK Software Company

- I worked there in three project as a front end developer and each one project had a different domain and also work a tester of web developer
- Collaborated with the back end team to improve user experience, enhancing overall user experience.
- For creating and design web app I used there HTML, CSS and framework like Tailwind CSS and Bootstrap 5
- Developed and maintained web applications using Vue.js, Developed a responsive design for mobile , tab and laptop
- Improved website performance by optimizing the design and SEO

PROJECTS

Fiverr Clone App

- Clone Fiverr App with the help of React , HTML and CSS (SASS).
- I create a reusable component in react and use it different pages to show the gigs and one single gig.
- In Fiverr app there all of those page like Home page, Gigs page , Add Gig, one single gig Chat section and many more...
- To navigate to one to another pages i used react router and create the better user experience

NETFLIX Clone App

- I create netflix app with user register page and login pages
- Craete a amazing hover effect like netflix , On hover video will automatic play with its description and the title of the movie or Tv serials
